DETAILED ACTION

Drawings

1. The drawings filed August 27, 2003 appear to be formal and are acceptable.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement filed April 5, 2004 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.
4. The information disclosure statement filed November 12, 2004 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.
5. The information disclosure statement filed June 20, 2005 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.

Claim Objections

6. The claims recite "as said detection region". Should this read -- at said detection region -- or, perhaps, -- in said detection region --?

7. Claims 1, 2, 4-9 and 11 recite "(reflection wave)". Is this phrase necessary? It appears to be repetitive.

8. Claims 8 and 9 are unclear. What exactly does "reflector setting" or "confirming setting" mean? In addition, the claimed process or method of what exactly is being claimed is unclear.

Claim Rejections - 35 USC § 112

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For the reasons stated in the above claim objections the claims are considered to be confusing as to what is being claimed.

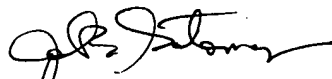

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various intrusion detection systems.
